

The following all-in-one warranty (the "**All-in-One Guarantee**") is provided by **Belinus Solar Bv**, with registered business address at Thor Park 8300, 3600 Genk, Belgium and may be contacted through email at info@belinus.be or through telephone at +32 16 91 03 14 (hereinafter referred as "**Belinus**").

The All-in-One Guarantee applies to the Belinus Solar Module models (hereinafter referred as "Module(s)") which are manufactured by Belinus which extends and applies only to the original end user who has lawfully purchased the product and any subsequent owner(s) of the location on which the Module(s) was/were originally installed (all such persons hereinafter referred to as the "Customer"). The All-in-One Guarantee's start date (the "Guarantee Start Date") shall be the date of purchase by the original end use purchaser as indicated in the official invoice or acknowledgement from Belinus. Failure of the Customer to provide adequate documentation as proof of the original purchase, the Guarantee Start Date shall be ninety (90) days following the Module(s) manufacture date.

1. 35 Years All-in-One Guarantee for Material or Workmanship

Belinus will repair or replace the Module(s) or refund under the current fair market price of the Module(s) within the applicable scope pursuant to section 3 (hereinafter referred as "How this All-in-One Guarantee applies") at its sole discretion, upon our determination that the corresponding Module(s) is/are defective in material or workmanship during a period of 35 years reckoned from the Guarantee Start Date under normal application, installation, use and service conditions.

2. 35 Years All-in-One Guarantee for Power Output

Belinus guarantees that for a period of one (1) year from the Guarantee Start Date, the actual power output of the Module shall be no less than 98% of the labeled power output. From the second year onwards, the actual power output will decline on an average annual base by no more than 0.3448% for the remaining 34 year, thereby at the end of the 25th year, an actual output of at least 90% is to be expected; thereby at the end of the 30th year, an actual output of at least 88% is to be expected. By the end of the 35th year, an actual output of at least 86% of the name plate power output level specified on the Module will be achieved.

Should the Module fail to reach the guaranteed power output levels set out above when measured by Belinus or by an independent measuring institute agreed to by the parties prior to the testing by Belinus under standard test conditions ("STC", IEC 61215), taking into account a $\pm 3\%$ tolerance range, Belinus will, at its sole and absolute discretion either: (i) repair the Module; (ii) supplement such deficiency in power by: (a) providing additional Module(s) to the Customer, or (b) replacing the Module; or (iii) refund the difference between the guaranteed minimal power output and actual power output (measured under Belinus's STC) multiplied by the fair market price of the Module or a comparable model at the time of the Customer's claim.

Repair and replacement are subject to the applicable scope covered under How this 35 years All-in-One Guarantee applies.

The power output values shall be those measured under Belinus's STC as follows: (a) light spectrum of AM 1.5; (b) an irradiation of 1000 W per m² and; (c) a cell temperature of 25 degrees

centigrade at right angle irradiation.

3. How this 35 years All-in-One Guarantee Applies

The remedies set forth in this All-in-One Guarantee shall be the sole and exclusive remedies and the original guarantee period shall not extend beyond the period set forth herein, nor will a new guarantee period begin to take effect upon repair, replacement or pro-rated refund due to power loss at Belinus's sole discretion. The determination of Belinus shall be final.

Any repair or replacement shall be made with either a new or remanufactured Module or parts and the replaced Module or parts shall become the property of Belinus. In the event that the Module is no longer available, Belinus reserves the right, at its sole discretion, to deliver a new or remanufactured Module that may differ in size, color, shape, model number, and/or power output level, provided it is comparable to the previous Module.

This 35 years All-in-One Guarantee covers the transportation cost for reshipment of any repaired or replaced Module to the Customer's site, and any other costs associated with installation, removal, or reinstallation of the Module.

Belinus grants our End Customer or Installer a flat rate fee of € 150.00 per system (i.e. photovoltaic system with a single grid connection) and a Warranty claim event, plus € 25.00 for each affected Solar Module for the costs of the dismantling of the affected Solar Module and the installation of the replacement or additional modules; any additional and incidental costs shall be borne solely by the End Customer or Installer. All costs for measurements and for assessments by qualified experts (e.g. if Belinus rejects All-in-One Guarantee claim event or if the End Customer or Installer cannot conduct such measurements personally) must be coordinated with and authorized by Belinus before the End Customer or Installer incurs such costs, otherwise these costs will be solely borne by the said End Customer or Installer.

This All-in-One Guarantee does NOT cover the transportation cost and all associated risks including shipping damage or loss in returning the Module to Belinus or Belinus's authorized agent. In any event that a returned Module is determined by Belinus to be not defective or its corresponding All-in-One Guarantee has already expired, the Customer shall be responsible to pay for the return shipping cost.
